

BUCCANEER

CHLORINE GENERATOR

THE SAFE ALTERNATIVE FOR TOTAL DAIRY SANITISATION

Now there is a safe & cost effective way to maintain high bio-security & hygiene levels within your dairy production operations.

The Buccaneer Chlorine Generator, utilizing dry calcium hypochlorite cartridges, is the sure and safe method to effect control on most troublesome & persistent disease causing micro organisms.

Calcium hypochlorite is not only safe to store, use & handle, but is an extremely powerful & broad spectrum sanitizing agent with virtually no possibility of pathogen resistance or immunity build up.

This product may be used in all areas of the dairy, from general wash-downs to udder rinsing.

The Buccaneer Chlorine Generator can be configured to suit nearly every situation & circumstance. A variety of models are available for immediate use or adaptation.

The Buccaneer mobile unit can be easily moved around the parlour for wash-down & will generate the required chlorine solution on demand. This system can be simply plugged into your existing water supply.

No expensive installation requirements. Very low maintenance. No training or experience needed to operate.

Low running costs & easy replacement of refill cartridge.

BENEFITS INCLUDE:

- BROAD SPECTRUM CONTROL OF MOST BACTERIA & VIRUS SPECIES RESPONSIBLE FOR MASTITIS
