

# BUCCANEER

CHLORINE GENERATOR

## THE SAFE ALTERNATIVE FOR MUSHROOM SANITISATION

Now there is a safe & cost effective way to enhance hygiene levels & overall biosecurity within your mushroom production operations.

The Buccaneer Chlorine Generator, utilizing dry calcium hypochlorite cartridges, is the sure and safe method to effect control on the most troublesome & persistent fungal, bacteria & viral diseases.

Calcium hypochlorite is not only safe to store, use & handle, but is an extremely powerful & broad spectrum sanitizing agent with virtually no possibility of pathogen resistance or immunity build up.

The calcium hypochlorite can be used in all areas of mushroom production, from general wash downs to watering systems.

The Buccaneer Chlorine generator can be configured to suit nearly every situation & circumstance, & a variety of models are available for immediate use or adaptation.

The Buccaneer mobile unit (shown below) can be moved around the production area for watering & will generate the required chlorine solution on demand. This system can be simply plugged into your existing watering facility.

No expensive installation requirements. Very low maintenance. No training or experience needed to operate.

Low running costs, easy replacement refill cartridges.

### BENEFITS INCLUDE:

- CONTROL OF BACTERIAL & FUNGAL CHALLENGES
- EXTENDED SHELF LIFE OF MUSHROOMS ON BEDS i.e. THE CROP STAYS HARDER WITH DRIER CAPS, THEREFORE HIGHER GROWING TEMPERATURES CAN BE ATTAINED
- CAPS SUSTAIN LESS BRUISING DURING HARVEST
- USER FRIENDLY, NON-TOXIC
- REDUCED WATERING TIME, NO COMPLICATED MIXING OF OTHER HAZARDOUS MATERIALS BEFORE WATERING
- ADVANTAGES OF AVAILABLE CALCIUM - BRIGHT WHITE CAPS & GENERAL IMPROVEMENT IN QUALITY INCLUDING EXTENSION OF POST HARVEST SHELF LIFE

## THE BUCCANEER UNIT IS IDEAL FOR USE IN A VARIETY OF APPLICATIONS
